

MONROVIA®
Grow Beautifully

Benefits of Grafted Gardenias

- Gardenia thunbergia is a large, vigorous, South African variety that is easy to grow and is used for the rootstock.
- Gardenia thunbergia rootstock enables the gardenias to thrive in poor soils and cooler coastal climates
- The healthy and vigorous root system of Grafted Gardenias will allow them to grow larger and faster with none of the problems associated with cutting-grown gardenias.
- Gardenia thunbergia takes in nutrients at much lower temperatures which enables them to grow and bloom in the cooler coastal climates and soils.
