Hummingbird Container

You can attract hummingbirds to any outdoor space, even if you only have enough room for a planter. This design uses three favorite flower types and a filler plant with lush, easy-care foliage.

- 1 **Big, bright flowers:** Oversized flowers in colors like red, yellow, and orange tell hummingbirds to “stop here” and fill up.
- 2 **Fine foliage:** Balance the upright flowers and bold colors with smaller-textured greenery that will trail over the edges of your container.
- 3 **Tubular flowers:** Trumpet-shaped flowers are like nature’s hummingbird feeders, perfectly shaped for their long beaks.
- 4 **A flower cluster:** A plant with small clusters of nectar-filled flowers makes an efficient fueling station and adds a pop of surprise to your design.
