# Hummingbird Weekend Project

This combo offers everything hummingbirds are looking for in a small space border. Just one weekend and four plant varieties are all it takes to edge your patio or seating area with a stunning invitation to hummingbirds.

- 1 Flower repeat:** Group multiples of a plant with tall flower spikes for a colorful hummingbird buffet.
- 2 Add a stunning container plant:** Create a real conversation piece with a chairside planter that brings hummingbirds right to eye level. A waterwise succulent won't need to be watered as frequently as other container-grown plants.
- 3 Tubular flowers:** Add trumpet shaped flowers in small clusters along the border as mini feeders perfectly shaped for long beaks.
- 4 Colorful shrubs:** Add end points to your border with flowering shrubs.
